

NGUYEN VINH TIENG

Web Developer

Email: vinhtiang123@gmail.com

Phone/Zalo: +84 35 3571 047

Address: Ho Chi Minh City

<https://vinhtiang.site>

Front-End Developer with 3+ years of experience building responsive, user-focused web applications.

I mainly work with front-end technologies and modern frameworks, and I also have a bit of exposure to back-end and DevOps. I care about clean UI, smooth interactions, and creating experiences that feel good to use.

SKILLS

Skilled in modern front-end technologies, with strong expertise in **JavaScript**, **TypeScript**, **React.js**, **Next.js**, **Vue.js**, **Nuxt.js**, and **Tailwind CSS**.

Experienced in **Angular** through working on small features and maintaining existing codebases.

Basic knowledge of **CI/CD** processes and **Nginx** configuration for deploying front-end applications.

Familiar with **Node.js**, **MongoDB**, **Docker**, and comfortable working in **Linux** environments.

Holds a Cambridge English B1 Certificate, demonstrating intermediate-level English proficiency.

EDUCATION

TON DUC THANG UNIVERSITY

(Jun 2019 ~ May 2023)

Graduated early with a **Very Good** degree, I am the only student in my class who graduated early with Very Good degree.

WORK EXPERIENCE

SMILEGATE VIETNAM (Aug 2024 ~ Now)

Position: Front-end developer.

Responsibility:

- Developed the admin management system for the indie game platform.
- Built features to support game content and user administration.

Main Technologies:

- NuxtJs, Tailwind CSS, UnoCSS.

DUDAJI (Dec 2023 ~ Aug 2024) ~ 9 month

Position: Fullstack developer.

Responsibility:

- Collaborated on system design and development of scalable, fast web apps using Next.js, Nest.js, and Electron for cross-platform support.
- Implemented real-time communication with WebSocket and WebRTC, and mentored new interns.

Main Technologies:

- ReactJs, NextJs, NestJs, MongoDB, Tailwind CSS, **WebSocket**, **WebRTC** and **ElectronJs**.

LAICHI (Apr 2022 ~ Dec 2023) ~ 1 year 8 months

Position: Front-end developer.

Responsibility:

- Developed responsive UIs from design files for Japanese clients.
- Maintained campaign sites using Vue.js and Angular.js with admin tool integration.

Main Technologies:

- VueJs, AngularJs, HTML, CSS, SCSS, JQuery.

PROJECTS

Indie Studio

Position: Frontend developer.

Description: A web platform for indie game companies to publish and manage their games on the Stove platform, reaching more players easily (<https://www.onstove.com>).

Demo (Client side): <https://studio.onstove.com>

Note: I developed the admin panel, which is not a public-facing page and cannot be published.

Middo

Position: Fullstack developer.

Description: Middo is a translation app supporting 50+ languages, combining chat and video calls to connect users worldwide. Available on web, mobile, and desktop.

Demo: <https://middo.app/>

LightChemical

Position: Frontend developer.

Description: As the main developer, I led the front-end development of this website, customized for a prominent Japanese chemical company. My responsibility was to implement user-friendly interfaces that effectively showcase the company's products and services.

Demo: <https://www.lightchemical.co.jp>

Hitachi

Position: Frontend developer.

Description: I was involved in the development of a new recruitment website for Hitachi, one of Japan's leading technology conglomerates. This website was designed to attract and engage new graduate candidates, providing information about job opportunities and the company's recruitment process.

Demo: <https://www.hitachi.co.jp/recruit/newgraduate/jm-navi>

Kanpane

Description: My responsibility was to build the user interface for this Japanese construction company. Additionally, I collaborated with the backend team, utilizing WordPress as our platform.

Demo: <https://www.kanpane.co.jp>

Glico

Description: This website promotes Japanese snacks through interactive animations that respond to scrolling, making the browsing experience more engaging and lifelike.

Demo: cp.glico.com/icenomi/minohi
